CQ WW FROM W3LPL

I operated 15 Meters at W3LPL and we had a blast in the recent ARRL SSB DX contest. Final totals (roughly):

BAND	QSO	MULT	OPS
160	47	31	W3EKT
80	235	80	W3LPL
40	430	90	N3GB, KC3EK
20	1700	147	WA8MAZ, K3RA
15	1930	151	WB2EKK, N8II
10	1800	153	WB3JRU, K1RZ, KF3P

Total Score: 11.8M, beating our record from last year.

Conditions were FB (you had a big signal, EI7M!) on the high bands, although 20 daytime really suffered from the high MUF. The low bands were really noisy, although you wouldn't know it from the QSOs.

We used 6 PCs, one for each band, I think 3 XTs and 3 386 machines, running CT in the multi-multi mode, connected to the W3LPL PVRC Packetcluster. What a blast, we were passing multipliers from band to band all weekend.

My best story of the weekend: the last few hours of the contest were pretty slow on 15 after EU died down, and the JAs were at work since it was Monday there. We ran around vacuuming the bands, but with 1/2 hour to go I decided to call CQ until the contest was over. Worked a few JAs, and then XU8DX called me! I asked her to move to 10 M, said QRZ? and then V85AA called! He wouldn't go to 10, but we picked up some quick last minute juicy mults. Both would have been new countries for me if I had been using my call!!

The constitution of the United States is such a law. You are the government. Why are you letting petty bureaucrats do these things?

A free country doesn't need secret police anyway. Why do they care who listens? I've been watching and never found a criminal who was any good at monitoring police and using it to his advantage.

>I have a question concerning having a scanner in a car in the
>state of Michigan.

>Section 750.508 of the Michigan Compiled Laws reads:

> Any person who shall equip a vehicle with radio receiving set
> that will receive signals unless such vehicle is used or
> owned by a peace officer or a bona fide amateur radio operator
> holding a conditional, general, advanced or extra class amateur
> license issued by the FCC shall be guilty of a misdemeanor,
> punishable by imprisonment in the county jail not more than 1 year
> or by a fine of not more than \$500.00 or by both

Was this extensively edited? From what left, only cops or hams are allowed to have AM/FM radios in the car.

Subject: Overseas airmail?
To: info-hams@UCSD.EDU

A DXer in one of those exotic Asian countries asked me for some help in getting some QSL cards printed. Suspecting that his annual income is probably more like my weekly income, I decided to buy him a couple of thousand. My question is, how do I send them?

Is anyone familiar with the costs sending say 9 Lbs (or 4 kilos) from the US to the far east via air? Is it terribly expensive? Is there any other option besides ordinary "surface" mail? I know that surface mail from Europe seems

to run 8-10 weeks; I can imagine that to a small island it
might be 4-6 months.

Suggestions appreciated.

i am attempting to set up a database for scanner frequencies.
anyone who wishes to share their frequencies and/or suggestions on
how i should set up the database please e-mail me at

wkirk@watdcs.uwaterloo.ca

i am looking for frequencies for ontario, canada and any other people
care to send. especially other canadian provinces. thanks
